## Power on/off

**Power on:** Hold power button on drone for 8sec until LEDs are on.  
The Speed Slider must be set to **“Rabbit”**!  
**Power off:** Remove battery

## Motor Start / Stop

Hold throttle stick in the lower right corner

## Flying

- ✓ Check location (rules and regulations)
- ✓ Free space for GPS signals, no potential reflectors to avoid multi-path reception
- ✓ Drone battery full, ST16 battery full
- ✓ **Check battery voltage during flight**

Bind mode: nsh shell command "typhoon\_bind start"
